SUMMARY

Dynamic and driven IT enthusiast with a passion for web programming, app development, and website building. Experienced as a front-end developer with an MNC, I have gained valuable hands-on experience in the field. I am eager to expand my knowledge and expertise further and seek a placement with a forward-thinking company in the IT industry. Committed, friendly, and ready to contribute to a dynamic team environment, I am currently pursuing opportunities as a front-end developer.

WORK EXPERIENCE

Infosys Ltd

Kerala, India

Systems Engineer

08/2022 – Present

- **Project Description:** The Infosys Live Enterprise Application Management Platform offers a comprehensive suite of services to manage and maintain enterprise applications, including automation, real-time monitoring, and intelligent analytics. It aims to optimize IT operations, reduce costs, and improve efficiency.
- **Responsibilities:**
 - Developed and Maintained Enterprise Application analytic dashboards, widgets, and components using Angular 14 with angular-gridster2.
 - Implemented RESTful API, utilizing Spring Boot framework, for aggregating complex business analytics data from SQL databases.
 - Collaborated with DevOps teams to integrate Docker and Kubernetes into the CI/CD pipeline, ensuring timely and efficient deployment of code changes to production environments.
 - Analyzed both functional and non-functional requirements by reviewing specifications with clients to participate effectively in the design, development, testing, and deployment phases of the project.
- **Validation and Testing:** Performed functional validation activities, identified defects, and fixed them to ensure application quality. Coordinated with the testing team for regression testing with each release and provided support for defect resolution.
- **Code Debugging and Major Fixes:** Played a key role in analyzing and debugging daily defects, finding quick and effective solutions based on business needs.
- **Requirement Gathering:** Engaged with the business team for requirement gathering and assisted with documentation for various tasks.
- **Contribution to Innovation:** Contributed to Research & Development efforts by creating new and innovative dashboard widgets from scratch using HighCharts and ApexCharts libraries, resulting in a more visually appealing and dynamic user experience.
